Local school boards are at the heart of this country's public education system. A board's role should be based on the belief that local control of public education makes schools flexible and responsive to the needs of the community. It is important that board members have personal attributes that allow them to be effective; this is to include the code of ethics by which they are expected to abide by. I believe that the actions demonstrated by Daniel Hernandez's behavior demonstrate ineffectiveness and portrays a negative image to our school district. He clearly does not understand that the reputation of the entire school district is reflected in his behavior and negative attitude towards school personnel. He needs to learn that the success in achieving board goals and implementing ideas requires a team approach.

He has repeatedly demonstrated that he does not have the courage to make difficult decisions and withstand criticism from people who hold opposing views. He is deceitful in his communication with the community and does not strive to be knowledgeable about policies and programs in order to make informed decisions. The School district has made significant improvement yet his behavior has splintered our community planting doubt in our families. He has involved his family in his negative campaign against the district making unsubstantiated accusations against other board members. Since elected to has missed several board meetings, he has also not physically attended other meetings. This demonstrates that he has personal engagements that do not allow him to invert the significant time and energy to be present. Therefore he should not represent our community.

School board members are responsible for decisive action in all areas that affect students and staff in schools. Some roles and responsibilities are implicit. Others are specifically mandated (A.R.S. §15-341) or allowed (§15-342) by Arizona law. Everything board members do is focused on providing the best education possible for the children in their community. I believe Buck Crouch refuses to accept the board's roles and responsibilities, putting the district in a vulnerable position. He is deceitful when communicating information to our community. He lacks integrity and does not understand the importance of honesty. His communication via television, social media and radio are outright disrespectful toward our children and district staff.

He has repeatedly demonstrated that he does not have the courage to make difficult decisions and withstand criticism from people who hold opposing views. He is deceitful in his communication with the community and does not strive to be knowledgeable about policies and programs in order to make informed decisions. The school district has made significant improvements yet his behavior has splintered our community planting doubt in our families.

Although there has been extensive training of the legal aspects of the policies and procedures of the board, he continues to disregard them. He compromises the Board and/or administration, and does not respect the confidentiality of information that is privileged under applicable law. He does not render his decisions based on the available facts and his independent judgment; he surrenders that judgment to individuals or special interest groups.
